

DIGITAL LITERACY PROJECT REPORT

NAME - SUMEDHA KASHMIRA

REG NO. - 25BCE10764

BRANCH - BTECH CSE(CORE)

YEAR - 1st YEAR

DATE - MARCH,2026

COURSE CODE - CSE0001

INSTITUTION - VIT BHOPAL UNIVERSITY

INTRODUCTION

This project is designed to develop essential digital literacy skills that are important for both academic and professional growth. It involves creating a Digital Literacy Portfolio that showcases the ability to use digital tools, build an online presence, communicate effectively, and stay safe in the digital environment. The project consists of five tasks, each focusing on different aspects such as creating an infographic, setting up professional profiles, exploring online platforms, writing formal emails, and understanding cybercrime awareness.

The scenario places the student in the role of a Digital Ambassador, responsible for guiding peers in navigating the digital world responsibly. Through this role, the student promotes safe internet practices, professional communication, and effective use of digital resources, making the project both practical and relevant to real-life situations.

TASK-1: DIGITAL LITERACY INFOGRAPHIC

For Task 1, I created a digital literacy awareness infographic using Canva, as it provides user-friendly templates and design elements suitable for beginners. The infographic was designed as a single-page visual that highlights key aspects of digital literacy, including its meaning, the importance of maintaining a professional online presence, and safe

internet practices. I used icons, short bullet points, and a clean layout to make the content visually appealing and easy to understand for students.

The design focuses on spreading awareness in a simple and engaging way so that even someone with limited knowledge of digital tools can quickly grasp the concepts. I ensured that the color scheme and fonts were consistent to maintain readability and professionalism.

While creating the infographic, one challenge I faced was organizing the information in a limited space without making it look cluttered. However, this helped me learn how to prioritize important content and present it effectively. Overall, the experience was interesting as it improved both my creativity and my understanding of digital literacy concepts.

TASK-2: STUDENT DIGITAL PORTFOLIO

For Task 2, I created and updated my profiles on three important platforms: GitHub, LinkedIn, and Kaggle. These platforms are widely used by students and professionals to showcase skills, connect with others, and explore learning opportunities. On GitHub, I set up my profile and created a README that includes my basic details and learning goals. On LinkedIn, I updated my education section with my current degree and institution details to maintain a professional presence. On Kaggle, I created an account to explore data science resources and practice problems.

Each platform serves a different purpose. GitHub is useful for storing and sharing projects, LinkedIn helps in building a professional network, and Kaggle provides opportunities to learn and practice technical skills. Together, they form a strong digital portfolio.

In the next four years, I plan to regularly update these profiles by adding my projects, achievements, and skills. This will help me build a strong online presence, improve my visibility to recruiters, and prepare for internships and future career opportunities.

TASK-3 : CODING AND COLLABORATION PLATFORMS

For Task 3, I explored both coding practice platforms and collaboration tools. In Part A, I created an account on HackerRank and completed a beginner-level problem, which helped me understand the basics of coding and problem-solving. The platform provides a structured way to practice programming and improve logical thinking skills. Solving even a simple problem gave me confidence and motivated me to continue learning coding in the future.

In Part B, I used Google Forms to create a Digital Literacy Awareness Quiz consisting of five questions. The quiz included both multiple-choice and short answer questions to test basic knowledge of digital literacy among students. I also viewed the responses in Google Sheets, which helped me understand how data can be collected and analyzed efficiently.

These tools are very useful for academic growth. Coding platforms help in improving technical and analytical skills, while collaboration tools like Google Forms make it easy to collect information and work efficiently. Overall, this task helped me gain practical experience with platforms that will be beneficial throughout my academic journey.

TASK-4:EMAIL AND ETIQUETTE GUIDE

- ☐ For Task 4, I understood the importance of maintaining proper digital communication, especially in professional emails and social media interactions. One situation where poor communication can create problems is when a student sends an email to a professor using informal language, without a proper subject line or clear message. This can lead to confusion and may leave a negative impression.

Such issues can be avoided by following basic email etiquette, including using a clear subject, polite tone, and well-structured content. Professional communication ensures that the message is understood clearly and respectfully. Additionally, being responsible on social media is equally important, as online behavior reflects a person's identity. This task helped me realize that effective communication is not just about what we say, but how we present it in a professional and respectful manner.

TASK-5 :CYBERCRIME AWARENESS

For Task 5, I explored the topic of cybercrime and learned about the various ways people can be targeted online. One of the most surprising aspects was how easily individuals can fall victim to scams such as phishing or online payment fraud, often without realizing it. Cybercriminals use simple techniques like fake messages or links that appear genuine, making it difficult to identify threats.

This task made me more aware of the importance of being cautious while using digital platforms, especially when sharing personal or financial information. As a result, one habit I will change is being more careful before clicking on unknown links or responding to suspicious messages. Overall, this task helped me understand the importance of staying alert and following safe online practices to avoid cyber threats.

CONCLUSION

In conclusion, this project helped me develop a strong understanding of digital literacy and its importance in today's world. Through the different tasks, I gained practical experience in creating digital content, building a professional online presence, exploring useful platforms, and understanding proper communication and cyber safety. Each activity contributed to improving my skills and confidence in using digital tools effectively. This project also made me more aware of responsible online behavior and the need to stay safe while using the internet. Overall, it was a valuable learning experience that will be helpful in my academic journey and future career.
